The third board members of the HKUST CEEAA were elected and are listed below:

JP Wang

03 – 06 Site Engineer, China Harbour Engineering Company Limited
09 – 01 Graduate Engineer, China Harbour – CWF Joint Venture
99 – 99 Project Coordinator, Flourcity Architectural Limited
96 – 99 BEng. HKUST

A dinner gathering celebrating the AGM, the 3rd Board was formed and the department’s yearbook was published. A special feature was the CEEAA Annual General Meeting and Facebook Group: Activities and a stronger bonding among our students were prepared for another Golden Year.

The year 2012 will mark the 20th anniversary of our department. In order to mark this milestone, we are organizing a series of activities, including a series of lectures, a symposium, and a jakiś (IStructE) or the HKIE Structural Engineering Fellowship Award for Young Engineers.

Professor Christopher Leung was named Fellow of RILEM, the world’s leading international committee on concrete structures. This year, the Hong Kong Wind Characteristics Project was successful, and the senior and junior research prizes were presented to Prof. Kwok and Dr. Chen.

New Faculty Members:
Dr. Jing Chen

Dr. Tin Yau Ng

Dr. Tak Wah Cheung

Dr. Joseph Y. T. Yip

Professor Christopher Leung was named Fellow of RILEM, the world’s leading international committee on concrete structures. This year, the Hong Kong Wind Characteristics Project was successful, and the senior and junior research prizes were presented to Prof. Kwok and Dr. Chen.

Our PG team comprising Luk Sung Hei, Andrew Bicho, Paul Chan, and Yi Chen continued to perform well in the IDEERS competition. The CIVL PG Team won the Best Team Award for the second consecutive year, and one of our team members was awarded the Best Individual Award.

Our PG students completed their postgraduate studies in the summer, and the Postgraduate Students Alumni Association reviewed their effectiveness and impact on their future careers. The alumni association reviewed their effectiveness and impact on their future careers. The alumni association reviewed the effectiveness and impact on their future careers.

Professor Christopher Leung was named Fellow of RILEM, the world’s leading international committee on concrete structures. This year, the Hong Kong Wind Characteristics Project was successful, and the senior and junior research prizes were presented to Prof. Kwok and Dr. Chen.

The Senior and Junior Research Prizes are awarded by the HKIE (the Hong Kong Institution of Engineers) for outstanding contributions in various fields and disciplines. This year, the Two senior research prizes were given to Prof. Kwok and Dr. Chen, while the Junior Research Prize was given to Prof. Hu.

Some of our PG students have won the Institute of Highways and Transportation (IHT) Prize in the past years. In 2012, the Institute of Highways and Transportation (IHT) Prize was awarded to Prof. Kwok and Dr. Chen for their outstanding contributions to the field of traffic engineering.

Professor Christopher Leung was named Fellow of RILEM, the world’s leading international committee on concrete structures. This year, the Hong Kong Wind Characteristics Project was successful, and the senior and junior research prizes were presented to Prof. Kwok and Dr. Chen.

Popular Chogokin toys, e.g. (top, front row) the Daiku Maryu, (middle row) the YUKI, and (bottom row) the Combattler, have become quite popular in recent years. The toys were based on popular super-hero cartoons and TV shows, such as Ultraman, Godzilla, and Gigantor. They were designed by the Japanese toy company Bandai and produced in the late 1970s and early 1980s.

Due to Prof. Hu’s fondness for these toys, his collection consists of 4 categories: (1) Chogokin, which includes the Daiku Maryu, YUKI, and Combattler; (2) Ultra Chogokin, which includes Ultra Seven, Ultra Q, and Ultra Monster; (3) Mecha Chogokin, which includes Grendizer, Getter Robo, and Machinder; and (4) Non-Chogokin, which includes kaiju monsters, robots, and other characters.

Professor Chen is among the second generation of Chinese students who have contributed significantly to the field of civil engineering. He has made a distinguished contribution to the field of water research and has won the Institute of Highways and Transportation (IHT) Prize in the past years.

Prof. Kwok successfully supervised the PhD student Yi Chen, who continued her studies in the field of traffic engineering. She has published several papers in this field and has been recognized for her contributions to the field.

The Hong Kong University of Science and Technology (HKUST) is a public research university located in Clear Water Bay, Hong Kong. It was established in 1991 and has since become one of the leading universities in Asia. The university is known for its strong emphasis on research and innovation, and it has produced several Nobel laureates and other accomplished professionals.

As the surname suggests, Ilias comes from Greece, where he was born in 1987. In 2005, he graduated from HKUST with a degree in civil engineering. His research interests include structural engineering, bridge engineering, and life-cycle-cost analysis of civil infrastructures. He focuses on developing new methods for the analysis and design of civil structures.

Ilias’ research is on structural engineering, bridge engineering, and life-cycle-cost analysis of civil infrastructures. He focuses on developing new methods for the analysis and design of civil structures. His research has been funded by several government agencies and private companies. He has published several papers in this field and has been recognized for his contributions to the field.

Our PG team comprising Luk Sung Hei, Andrew Bicho, Paul Chan, and Yi Chen continued to perform well in the IDEERS competition. The CIVL PG Team won the Best Team Award for the second consecutive year, and one of our team members was awarded the Best Individual Award.

The year 2012 will mark the 20th anniversary of our department. In order to mark this milestone, we are organizing a series of activities, including a series of lectures, a symposium, and a some others. Also primarily made by Bandai. They came in various spin-off of Bandai. They came in various categories, including popular heroes, monsters, robots, and other characters. These toys were designed by the Japanese toy company Bandai and produced in the late 1970s and early 1980s.

The year 2012 will mark the 20th anniversary of our department. There will be many new projects coming up in the civil engineering industry. Which one was the most significant benefits to society. In 2010, 34 IWA members were bestowed on those who have been elected a Fellow of the International Water Association (IWA) in recognition of his extraordinary contributions to worldwide activities. The third board members of the HKUST CEEAA were elected and are listed below: CHAM Shuk Wun and YIP Ka Yin together with other alumni. Please also plan. A dinner gathering celebrating the 20th anniversary of our department will be held. A wine tasting dinner is also scheduled. Anyone can attend. The Voltes V Boxsets are shown below, may now cost more than some others. Also primarily made by (The rest of Prof. Hu's toy collection will be covered in the next issue of the newsletter.)
News

He is now working as the Project Manager for a number of complex civil engineering projects in the Greater Hong Kong area, having gained over 12 years of experience on site construction and design. He has been involved in the planning, design, and construction of major infrastructure projects such as the West Kowloon Airport Express, the Hong Kong - Macau Bridge with the West Kowloon Highway, and the new PolyU Campus East Link. Through these projects, I have gained invaluable experience in leadership, team management, and problem-solving.

Through these projects, I have gained invaluable experience in leadership, team management, and problem-solving.

You have served as the President of the CEEAA for several years. You have been involved in the AGM, the 3rd Board was formed and 20 years of our department will be celebrated in 2012. In the 65th RILEM week, Prof. Christopher Leung received the RILEM Award for his significant contributions to the field of structural dynamics.

We have won the Institute of Highways and Transportation’s Award for our contribution to the industry.

First, do not be afraid of suffering and/or financial support. Ms. Sun is now working for a number of major construction companies and has gained significant experience in the industry. She has been involved in the planning, design, and construction of major infrastructure projects such as the West Kowloon Airport Express, the Hong Kong - Macau Bridge with the West Kowloon Highway, and the new PolyU Campus East Link. Through these projects, I have gained invaluable experience in leadership, team management, and problem-solving.

When we prepare for the traffic schemes and design of the road network, we found that the design of the road network is similar to the topology of the brain. In the judgment of their peers, have made a number of contributions to the field of civil engineering.

The fellowship program’s second batch of fellows have been produced. Due to Prof. Hu’s fondness for popular super-hero cartoons and TV shows, the 70s or 80s may remember some of the versions started appearing which could be too bulky to keep, and identical retro versions of selected Chogokin characters, e.g. (top, front row) the Daiku Maryu, (top left) vs. 12” figure (bottom left), versions of selected Chogokin characters, e.g. (top, front row) the Daiku Maryu, (top left) vs. 12” figure (bottom left), etc. Prof. Tung received the Distinguished Service Award from the HKIE Joint Structural Dynamics Committee.

The Institution of Structural Engineers (HKIE) is a professional body for structural engineers in Hong Kong. It promotes the professional development of its members and represents the interests of its members in the community.

Our PG team comprising Luk Sung Hei and Du Wenqi has won the Best PG Team prize for the second year in a row. As the name may suggest, toys in this range are versions of Chogokin characters such as the Chogokin vs. Soul of Chogokin. They are focused on the toy market, with a mix of Chogokin toys, e.g. (top, front row) the Daiku Maryu, (top left) vs. 12” figure (bottom left), etc.

New Faculty Members

Prof. Thomas Hu’s Toy Stories

During the 65th RILEM week, held in Greece. In 2010 Ilias left Greece to work for a year as a research fellow at the Department of the Aristotle University of Thessaloniki, in which he was supervised by Professor Kwok, in his research on structural dynamics (methodology of structural dynamics) and creative collaborations. His work has been published in several international journals and conferences.

In his research on structural dynamics, Ilias has focused on developing new methods for analyzing the behavior of structural systems, with particular emphasis on earthquake engineering. His work has contributed to the development of advanced computational techniques for predicting the response of structures to seismic loads.

His research has also helped to advance the understanding of the role of structural dynamics in earthquake engineering, with a focus on the development of new approaches for predicting the behavior of structures under seismic loads. Ilias’ research is on structural engineering, bridge engineering, and the development of innovative solutions for the design and construction of complex civil engineering projects.

The Senior and Junior Research Prizes are awarded to the best papers presented at the Structural Dynamics Conference. These prizes are sponsored by the Institution of Structural Engineers and the RILEM Structural Dynamics Committee.

In the summer, 119 undergraduate students graduated from the Department of Civil and Environmental Engineering. Our department’s tradition with respect to student summer opportunities and internships continues. Our undergraduate students have been involved in a wide range of projects, including design, construction, and research.

Our PG team comprising Luk Sung Hei and Du Wenqi has won the Best PG Team prize for the second year in a row. As the name may suggest, toys in this range are versions of Chogokin characters such as the Chogokin vs. Soul of Chogokin. They are focused on the toy market, with a mix of Chogokin toys, e.g. (top, front row) the Daiku Maryu, (top left) vs. 12” figure (bottom left), etc.
